

Features

- Durable Extruded Aluminium Construction
- Attractive, Low Profile Design
- Standard Single Gang Mount
- Easy Test & Reset Capability
- Converts to Double Action
- Glass Rod Optional

Description

Attractive and durable, Mircom's MS-403U & MS-404U Emergency Manual Stations provide manual emergency reporting. The MS-403U and MS-404U Emergency Manual Stations are non-coded, single action devices which initiate both a N.O. and N.C. contact when pulled. Operating instructions shall be in English lettering and the unit shall be constructed of extruded aluminium and finished in bright enamel paint to provide quick identification.

Mircom's model MS-403U Manual Station is finished in enamel Blue and the MS-404U Manual Station is finished in enamel Yellow. An abrasion resistant label with large, raised letters provides clear legible instructions. On custom orders, manual stations can be easily converted from single action to double action station by the addition of the MS-DA double action lever kit.

Operation

Pulling on the station's handle will release the internal switches to control or release any peripheral device. Both manual stations contain one Normally Closed switch and one Normally Open switch when in the closed position.

All manual stations shall be installed as per the specific requirements outlined in the UL codes, as well as all other applicable national and local codes.

Resetting is accomplished by inserting a 1/8" screwdriver from the front. The handle, once pulled will remain open and cannot be reset without utilizing the screwdriver.

Specifications

The single action Emergency Manual Station shall be Mircom's MS-400U Series. Operating instructions shall be in raised English lettering and the unit shall be constructed of extruded aluminium, finished in either Blue (MS-403) or Yellow (MS-404) enamel paint to provide quick identification. Pulling the handle shall initiate immediate operation of the peripheral(s) connected.

Dimensions

Wiring Diagram
