

- UL and cUL listed
- 24 VDC with 95, 110, 135, 150, 177 or 185 cd settings
- 6 distinct candela settings
- Candela selection view window
- 33 sound output settings
- Horn or chime sound output
- Pre-wire back plate
- Universal back plate mounting (single gang, double gang, octagon, or 4" square)
- Single screw mounting
- Wall mount
- Indoor only
- Low current draw

The SH-24H Select-A-Strobe/Horn™ Series provides a wide range of candela light output options in a single device. The candela settings include a 24 volt DC operation for the 95, 110, 135, 150, 177 or 185 setting. The candela setting is displayed through the front window and is selectable using a drum wheel.

The horn settings include Temporal, Non-Temporal, March Time and a Chime sound. The horn also has Low, Mid and High volume settings for each pattern and tone. The tones include 2400 Hz, Electro-Mechanical, Broadband and Chime.

The voltage input can be either regulated DC or full wave rectified

(FWR) 24 volt operation with an operating range from 16 to 33 VDC. The strobes can be synchronized using a control panel with the Potter (Amseco) sync protocol or a SMD10-3A sync module.

The SH-24H utilizes a universal mounting plate that will mount on a single gang, double gang, octagon and 4" square electrical boxes. The back plate allows the installer to mount the plate and connect the wire connections. The strobe attaches in a hinge fashion from the top and is secured by a single mounting screw. The strobe completely covers the mounting back plate, therefore it can be mounted before other trades work is completed and not affect the final look.

Installation

DWG# 8910005-1A

CAUTION

A jumper plug is provided to test for correct wiring in the supervisory mode only. Do not pass alarm current through the jumper.

Note: Installation must comply in accordance with applicable standards.

WARNING

High voltage may be present inside the light assembly even though power is not connected. If access to the component board is required (removal or replacement), the capacitor must be discharged by touching a wire to both ends of the flashtube.

DO NOT attempt to touch or move the assembly until the capacitor has been discharged.

Specifications

Strobe Current

Light Output	Max. RMS Operating Current (mA RMS)	
	Reg. 24 VDC	Reg. 24 FWR
95cd	151	201
110cd	161	215
135cd	178	235
150cd	190	248
177cd	218	283

Engineering Specifications

The installer shall provide and install the Potter SH-24H Select-A-Strobe/Horn™. The strobe shall have six (6) candela settings. The candela settings shall be selectable using a drum roller and shall display the candela setting on the front of the device. The horn shall have 33 selectable settings configurable by dip switches. The sounder shall be capable of ANSI Temporal Code 3, March Time and produce a chime output. The horn shall have three distinct volume levels. The strobe/horn shall operate at 24 VDC regulated or full wave rectified. The strobe/horn shall have an operating range between 16 and 33 VDC. the strobes an by synchronized using a control panel with the

Potter sync protocol or the SMD10-3A sync module. The strobe shall utilize a mounting plate that allows the installer to pre-wire the mounting plate. The mounting plate shall be universal and mount on a single gang, double gang, octagon or 4 inch square box. The mounting plate shall be completely covered by the strobe and shall be secured by a single screw. The strobe shall be UL listed to standard 1638, General Signaling, and standard 1971, Signaling Devices for the Hearing Impaired. In addition, the strobes shall be cUL listed to CAN-ULC S526. The horn shall be UL listed to standard 464, Audible Signaling Devices.
